

DirectCheck

Direct Check software enables your business to take a check over the telephone, enter and verify the check information in the software, and print "ready to deposit" paper checks right from your laser printer. By installing the Direct Check software, your business gets paid immediately. Best of all, there are no transaction fees.

DIRECT CHECK OVERVIEW

Why wait for the payment? That's not the question, it's the answer. The process is simple. You get verbal authorization to produce a draft check from the customer's bank account, then print, sign and deposit the check in your bank. What could be easier? Direct Check will track payment plans, produce notice of intent to deposit letters, and provide statistical reporting to track employee performance. Direct Check is available as a stand alone or network version and is integrated with the Regal ACH Processor for businesses that want the convenience of printing checks and/or sending to ACH within the same batch. You will increase your payments and collections, all with no transaction fee!

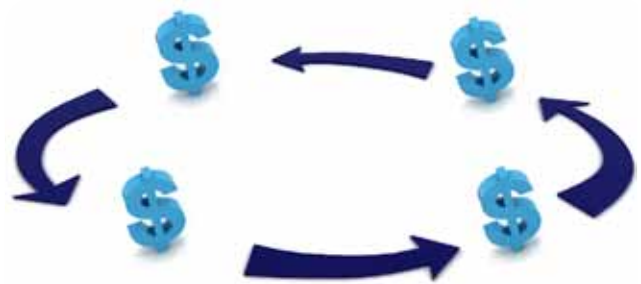

DIRECT CHECK IS DESIGNED FOR MERCHANTS THAT:

- Accept payment from customers by phone
- Want the ability to print paper drafts
- Want to eliminate broken promises
- Want to reduce follow up times
- Want to produce check payments without transaction fees

SECURE IMMEDIATE PAYMENT

Direct Check, Inc. (DCI) has a high security PC-based check production software system utilizing your basic office equipment that enables your company a proven method to secure immediate payment for goods and

services. The process is simple. You obtain customer bank account information via the telephone and print a pre-authorized check right in your office -- you then deposit the check just as if you received it in the mail.

ACCELERATE CASH FLOW

DCI is a cost-effective alternative to credit card telephone transactions. In short, Direct Check Production Software accelerates your cash flow, increases collections, and makes your company more competitive through reduced direct and indirect payment application operating costs.
